"CONTROLLABLE INFRARED PHOTONIC CHAMBER"

MINNEAPOLIS, MN. Another Wellness USA fitness & wellness technology invention has received approval for publication as **US Patent US2020/0384288**

A1: Providing controllable infrared thermal technology, multi-colored lights and holistic natural energies for:

- a) Improved wellness applications;
- b) Accelerated fitness recovery;
- c) Whole body quality of life.

INFRARED PLUS HOLISTIC ENERGIES

The new controllable photonic energy chamber has holistic natural energies, known as "**Thermal Lightwave Energy (TLE)**" to help improve wellness and fitness. The **TLE** combinations allow the user to control duration and intensity of eight (8) energies: gentle and safe **NIR, MIR and Far infrared wavelengths (WL)**, visible color-ambient chromo lights WL, jade gemstone, Himalayan mineral salt-tile, O2 ionization, O3 ions and pure enriched-air oxygen in a luxury Red Cedar IR sauna chamber.

"The **Controllable Photonic Chamber** is an important personal-wellness and fitness recovery system; it's recognized as a time-saving fitness invention and new advancement in healthy and luxurious sauna sessions" said inventor Steven Daffer.

EIGHT NATURAL TLE | ALL-IN-ONE WELLNESS TECHNOLOGY LUXURY SAUNA

(57) **ABSTRACT**

A chamber providing controlled amounts of IR and visible light within an internal space sized to seat at least one human being. The chamber includes at least one heater configured to emit FIR energy, at least one heater configured to emit NIR energy, and at least one heater configured to emit at least MIR energy. The chamber includes at least one light emitting source configured to emit a selected wavelength of visible light, and a control panel configured to control the amount and duration of FIR, MIR, NIR and visible light within the chamber.
